PEBLINE CLOSURE STRIPS

PEBLINE Closure Strips are essential components in metal roofing systems, often overlooked but immensely valuable, offering **lasting protection from weather elements and enhancing energy efficiency**. Understanding their application can greatly enhance roof durability and energy savings. Making informed choices about their use ensures benefits from a high-performance roof for many years.

PRODUCT INSTALLATION

FEATURES AND BENEFITS

- ✓ Material – EVA Foam
- ✓ Resists UV rays
- ✓ Different profile configurations and thicknesses are available.

- ✓ One-person installation
- ✓ Available with adhesive

BASIC PRODUCT SPECIFICATION

- ❖ **Sizes** : 20mm x 50mm x 1000mm (1m length)
- ❖ **Density** : 30kg/m³
- ❖ **Temperature ranges** : -20° to +90°

BENEFITS /APPLICATIONS

- ❖ **Better Weather Resistance:** PEBLINE Closure strips close gaps in roof vents, eave laps and sidewall applications ensuring weather tightness.
- ❖ **Protective Shield:** PEBLINE Closure strips prevent pests /insects, moisture, debris and wind-blown rainwater particles from infiltrating building through gaps.
- ❖ **Energy Efficiency:** PEBLINE Closure strips help create a stable indoor temperature by blocking air leaks, significantly decreasing heating and cooling costs.
- ❖ **Noise Reduction:** PEBLINE Closure strips act as sound barriers to reduce noise generated outside by traffic, rainfall providing some relief during such conditions.
- ❖ **Extended Lifespan:** PEBLINE Closure strips help reduce corrosion and moisture-related damage,prolonging the lifespan of metal roofs.
- ❖ **Long-Term Cost Savings:** PEBLINE Closure strips offer long-term benefits like enhanced efficiency and an extended roof lifespan, which can lead to substantial cost savings over time.

SAFETY PRECAUTIONS

- ❖ For best results, avoid applying PEBLINE closure strips when the metal roof temperature is below 0 degrees Celsius or above 40 degrees Celsius, and to prevent thermal degradation, avoid applications where the service temperature exceeds 90 degrees Celsius.
- ❖ For optimal performance and to ensure the safe use of PEBLINE Closure strip products, a suitably qualified professional must verify all specifications and calculations
